

PRADEEP KUMAR GUPTA

Cloud & DevOps Engineer | Platform Engineering | Kubernetes • GKE • Terraform • CI/CD

Delhi, India (open to relocation & sponsorship) • +91 86049 32809 • impradeepkumargupta@gmail.com
linkedin.com/in/impradeepkumargupta • github.com/impradeepkumargupta • impradeepkumargupta.github.io • IELTS 7.0

PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of experience designing, implementing, and maintaining cloud automation solutions across Kubernetes environments for a telecom-scale platform serving ~1,000 customer nodes. Skilled in Infrastructure-as-Code (Terraform, Ansible), CI/CD (Jenkins, GitLab CI, GitHub Actions), and containerized application delivery (Kubernetes, Docker, Docker Swarm). Google Cloud Certified Professional Cloud Architect with hands-on experience in observability (ELK Stack, Grafana, Zabbix), Linux (RHEL) administration, and DevSecOps practices. Currently developing platform-engineering expertise for AI/ML workloads. IELTS 7.0 — visa and relocation ready for sponsored roles in the US, EU, Australia, India, and Nepal.

TECHNICAL SKILLS

Cloud: Google Cloud Platform — GKE, Compute Engine, Cloud SQL, Pub/Sub, BigQuery, Cloud Functions, Cloud Monitoring, IAM

Containers & Orchestration: Kubernetes, Docker, Docker Compose, Docker Swarm, Helm

IaC & CI/CD: Terraform, Ansible, GitOps, Jenkins, GitLab CI, GitHub Actions, Git

Observability: Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Zabbix, Cloud Monitoring & Logging

Systems & Scripting: Linux (RHEL) Administration, Networking, Python, Bash/Shell Scripting, MySQL

Security: DevSecOps practices, security validation in CI/CD, deployment standardization

PROFESSIONAL EXPERIENCE

DevOps Engineer

Feb 2023 — Present

Ericsson India Pvt. Ltd. — Gurugram, India

- Designed, implemented, and maintained cloud automation across production-grade Kubernetes clusters on GKE, improving workload scalability, resilience, and deployment reliability.
- Deployed and supported containerized applications using Kubernetes, Docker, and a 100+ service Docker Swarm cluster in collaboration with development and architecture teams.
- Built and managed CI/CD pipelines using Jenkins, GitLab CI, and GitHub Actions to automate build, test, and deployment for Java and Python applications.
- Automated infrastructure provisioning and configuration management using Terraform and Ansible.
- Built centralized monitoring, alerting, and logging using ELK Stack, Grafana, and Zabbix, supporting platform reliability and performance optimization.
- Administered Linux (RHEL) systems and networking — process/package management, filesystem optimization, permissions, and troubleshooting.
- Applied DevSecOps and security/compliance principles across CI/CD workflows.
- Reduced cloud infrastructure costs by ~30% through resource optimization, autoscaling, and monitoring-driven improvements.
- Contributed to migrating 200+ virtual machines from Kyndryl infrastructure to GCP with minimal downtime and improved platform stability.

Project — MITO (Management of IT Operations)

Internal platform initiative, Ericsson

- Built CI/CD pipelines using GitLab CI to automate build, validation, and deployment workflows.
- Deployed and orchestrated containerized microservices using Docker and Kubernetes.
- Implemented centralized monitoring/logging using ELK Stack, Grafana, and Zabbix for proactive incident detection and operational visibility.

CERTIFICATIONS

- Google Cloud Professional Cloud Architect — Google (Issued Dec 2025, Expires Dec 2027)
- Cloud Architecture: Design, Implement and Manage — Google (Jul 2025)

- Build Infrastructure with Terraform on Google Cloud — Google (Aug 2024)
- Monitor and Log with Google Cloud Operations Suite — Google (Oct 2025)
- LFS169: Introduction to GitOps — The Linux Foundation (May 2025)
- BCSS Automation Fundamental Level — Ericsson (Sep 2024)
- IELTS Academic — Overall Band 7.0 (IDP Education)

EDUCATION

B.Tech, Computer Science and Engineering
Vellore Institute of Technology (VIT), India • CGPA 7.92 / 10

2019 — 2023

+2, Science
Tilottama Higher Secondary School, Butwal, Nepal • CGPA 3.61

2017 — 2019

ACHIEVEMENTS

- Supporting telecom infrastructure serving approximately 1,000 customer nodes in production.
- Managing Kubernetes and Docker Swarm environments running 100+ production services.
- Migrated 200+ VMs from legacy infrastructure to GCP with minimal downtime; reduced cloud costs by ~30%.
- COMPEX Merit Scholarship — All-Nepal Rank 66. Full scholarship awarded by the Embassy of India, Nepal, for undergraduate studies.
